THE DESIGN
EXPERIENCE

THE DESIGN PROCES

1 Initial Meeting

Here is our chance to get acquainted, and for us to hear about your intentions. Together, we go through all the aspects that may influence the project, such as plans, your timeline, budget and your goals in regard to functionality and style. If feasible, we will also offer to meet on-site and take preliminary measurements.

2. Sketch Proposal

You will be invited to a meeting in the showroom, where, based on your dreams and the possibilities on site, we will present our proposed solution. Together, we will review the sketch proposal, the preliminary estimate, and the terms of the project. If you choose to proceed from here, we will prepare a collaboration agreement for you.

3. Clarification

We believe that every project is unique. There are many choices and considerations that will help you to navigate, so that the final result reflects your dreams. Depending of the complexity of the project, we will meet with you as needed in our showroom, where we present materials and samples.

4. Orderering

Once the details have been agreed upon, we will prepare production drawings which serve as the basis for the actual order. The production time is approx. 12 weeks from your approval of our drawings. We have our own fully modern carpentry workshop north of Copenhagen. Payments are arranged in installments: 45 % upon order, 45 % at the scheduled start of installation, and 10 % upon final settlement.

5. Delivery

Before the installation begins, you will be contacted by our installation manager, who will be involved throughout the process. We have our own dedicated installers, ensuring the best results. If the project includes stone countertops, you should expect an additional 3 weeks for installation. After the installation, we will conduct a walkthrough together, where any deficiencies will be noted and subsequently corrected.

At Simonsen & Czechura, we are convinced that personalized design and timeless craftsmanship help create the best solutions for your home.

Our designs are based on the architectural expression of the home to achieve harmony, longevity and optimal functionality.

Brand Collections

Over the years, we have developed a range of brand collections, each optimized in terms of design and usability. We have tested each of these designs to ensure that the details support the concept, and that the overall expression comes through strong and clear. Our collections range from classic hand-painted finishes to expressive wooden furniture and minimal sculptural designs of metal, stone and other materials.

By starting with one of our brand collections, you ensure a stylish and functional final result. However, it is important to emphasize that these collections are not binding standards and can be customized and tailored to suit your preferences. All furniture, aside from our Modular series, is fully adapted to your homes dimensions.

If the project adheres to one of our brand collections, the design consultation is included in the total price. However, should there be need of a more comprehensive projects, offering complete solutions involving lighting, colour, space planning, and project management, we offer our expert design support on an hourly basis. This is also the case if you choose bespoke solutions, where we work together in development of completely new and unique design.

We offer the following services at a fixed hourly rate:

- Space planning and layout
- Multi-room projects (kitchens, utility rooms, bathrooms, wardrobes, wine rooms, etc.)
- Colour consultation.
- Lighting consultation, including selection of light sources and lighting plans
- Installation drawings related to plumbing and electrical work
- Consultation on the selection of additional building details (e.g., doors, windows, panels, staircase design, facade etc.)
